Subject: RDA's are now incorporated under the Dietary Reference Intakes (DRI's)

To All Title III Nutrition Providers:

Just a heads up on the nutrition requirements as outlined in the Older Americans Act. The RDA's are now incorporated under the Dietary Reference Intakes (DRI's). Your menus, recipes and nutritional analysis must reflect compliance with the DRI's. A process has been underway with the Rock Springs WSSB innovative grant for menus to be developed that meet the DRI's. Technically, AoA has told us that compliance with the DRI's is now. So, you should be working toward compliance if you are not already meeting the DRI's. Compliance with the DRI's must be in place by the start of the next fiscal year, 2007 (October 1, 2006 through September 30, 2007). If you have any questions about this requirement, or have difficulty meeting the guidelines, please let me know.
